# About Impact Solar

## Proven Track Record in Solar Development

Impact Solar, a wholly-owned subsidiary of Impact Electrons Siam Company Limited (IES), is dedicated to the development of solar rooftop projects. We hold an extensive track record in the field of renewable energy project development, proven by our accomplishments in Thailand and the Asia Pacific region. With over 8 years of development expertise in solar and more than 280 MW in our pipeline across Thailand and Japan, we can ensure that only the highest quality products and services will be delivered to our customers.

## Unique Savings Plans

With Thailand's abundant solar resources, as well as countless roof spaces on commercial and industrial buildings, Impact Solar foresaw this opportunity and initiated Thailand's first solar rooftop private PPA scheme in which no initial investment cost is required from the property owner. Impact Solar provides clean solar energy directly to end users through tailor-made solutions designed to meet each customer's energy needs.
